Routine and non-routine decisions: the 6 Cs

The 6 Cs

Construct: say what you must decide, in one sentence.

Compile: what must stay true? Exits, stair tops, critical and women's posts.

Collect: who is free, who is near, what can Alpha 1 send?

Compare: speed, safety, the effect on the team.

Consider: what could go wrong? Where does the problem move?

Commit: decide, brief, tell Alpha 1, set a time to check.

Never empty an exit or a critical post to fix a queue.

Before you commit

Routine? Use the plan and the Dot Plan.

Staff from another zone? Ask Alpha 1.

Below the minimum? Tell Alpha 1 or Control.

Enough facts to be safe, then decide. Same rules for everyone.

Be ready to say: I decided … because …

Radio: call sign, where, what, what I am doing, what I need, over.

Danger to life first: act, and tell Control. No Control? Call 911. Fire 998. Ambulance 997.
